Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

None of the prior art made of record teaches or suggests a three-dimensional CAD apparatus comprising:

a judgment unit arranged to judge whether to select an output processing for a 3D model from among a plurality of processings; and

a storage unit arranged to store a mode having a plurality of setting items for making the image processing of data for the 3D model in correspondence to the output processing of the 3D model;

wherein the judgment unit switches the mode in accordance with a selection of the output processing for the 3D model.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The closest prior art, Batori et al (US 2002/0118229) disclose (Figs. 2 and 3) a three-dimensional CAD apparatus for making use of a 3D model (3D shape) prepared

Art Unit: 2676

by 3D-CAD. The three-dimensional CAD apparatus allows adding attribute information (distances, angles, hole diameters, dimensional tolerances, etc.) to the 3D model. The attribute information is also inputted into the 3D model by indicating and selecting each of surfaces, edges, centering lines, vertexes, or the like of the 3D model. However, Batori et al fails to disclose the claimed "a storage unit arranged to store a mode having a plurality of setting items for making the image processing of data for the 3D model in correspondence to the output processing of the 3D model; wherein the judgment unit switches the mode in accordance with a selection of the output processing for the 3D model."
